Quality Assurance Engineer

Forge has exciting plans for 2021. We are really good at designing and making a huge variety of cutting edge LED products. We're looking for a dynamic Quality Assurance professional who can both manage our robust and established Quality Control operation on a day-day basis, and champion its future development in line with the company's significant growth aspirations. Quality Assurance experience and technical ability are important as is a profound dedication to customer service and continual improvement.

Are you an experienced engineer, able to understand our technical products range? Could you liaise with customers and suppliers relating to quality matters? Have you experience of running quality audits to help drive improvements?

Forge is a market leader in custom LED lighting, a previous Queen's Award Winner for outstanding innovation, experienced (we have been successfully adapting to changing markets for over 27 years) and located on the edge of the stunning Lake District.

Hours are negotiable from a minimum 24 hours/week part-time up to 37 hours/week full-time considered for the right candidate.

If you think you have got the skills to make a positive difference, we would love to hear from you.

Key Responsibilities

- Responsible for the Quality of Manufacture of LED optoelectronic components, LED assemblies & LED lighting products & related goods
- Development, improvement, modernisation & streamlining of the company's Quality Management System.
- Incoming & outgoing goods inspections.
- Customer liaison/contact for quality-related matters.
- Supplier quality monitoring & development.
- Internal auditing. External auditing (suppliers and customers).

clever light solutions

Skills/Experience:

- Proven experience of mechanical, electrical/electronic & optical metrology
- A degree or HND in a relevant Science or Engineering discipline
- Experience of ISO 9001 Quality Management System (preferably in a developmental role)
- Experience of ISO 14001 Environmental Management System is an advantage
- Knowledge, understanding and practical experience of statistical quality control techniques & methods
- IPC610 practitioner (preferred but not mandatory)
- Good communication skills able to deal effectively with customers and suppliers
- A problem solver, who is self-motivated with a 'can-do' attitude and a good eye for detail

Why Work for Us?

Based in Ulverston in the South Lakes, you will be a key part of our technical team, reporting to our Technical Manager.

Benefits include:

- Competitive salary based on experience and qualifications
- Profit Share Scheme
- Workplace Pension Scheme
- Flexible Working Arrangements
- Free on-site parking and close links to public transport

Our location offers the best of life/work balance as you can walk straight out of work and into the Lake District as well as enjoy life in a vibrant market town.

Please visit www.forge.co.uk or contact jobs@forge.co.uk or phone 01229 580000 for further information.

To Apply

We are looking to recruit as soon as possible. Please send your CV together with a covering letter outlining your current salary (if applicable) and explaining why you think you are just the person for this role.
