## REACH Compliance Statement

### Reach Initiative

As of June 2007, the European Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) entered into force. The retained EU REACH Regulation (UK REACH Regulation) and the updated REACH (Amendment) Regulations 2021 (which added eight new SVHCs to the candidate list) are in place.

### Reach Compliance Review Statement

Forge Europa is committed to managing its environmental responsibilities effectively and to remaining fully compliant with the European Regulation (EC) 1907/2006 and REACH (Amendment) Regulations 2021 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) at all times.

Forge regularly reviews its products to ensure they meet the requirements of REACH and all approved amendments to the REACH Regulations.

Forge communicates regularly with its supply chain and to the best of its knowledge and belief none of the products designed, manufactured, purchased, or supplied by Forge contain any of the substances on the REACH candidate list in concentrations of >0.1% by weight. Forge's products do not require registration under the REACH Regulations.

In the future, if Forge's monitoring indicates a change in REACH status for any product it supplies to a customer(s), Forge Europa will inform that customer(s) accordingly and register that chemical under REACH. Forge Europa remains actively committed to regularly reviewing the chemical contents of its products and parts thereof and to limiting its use of chemicals.

If you have any queries, please contact your Forge representative.
